

## About Michelle Perro

---

Nearly four decades as a pediatrician, 20 years as an integrative medical physician, and co-author of , "What's Making our Children Sick? How Industrial Food is Causing an Epidemic of Chronic Disease and What Parents (and Doctors) Can Do About It".

It has been a journey educating the public and health practitioners alike, nationally and internationally regarding the health effects of environmental toxicants on children's health. Co-Founder and Executive Director of [www.gmoscience.org](http://www.gmoscience.org): A science based website dedicated to the effects of GMOs and their associated pesticides with a lens on health. Founder of a weekly interactive program for parents with discussions on holistic health.

2:00 to 2:30 [Questions & Answers](#) with Michelle

## What will you learn?

If you or your loved ones are struggling with health issues, don't miss this once-in-a-lifetime opportunity to see, listen, and talk with Michelle Perro, a world known doctor from California who has dedicated her life to helping sick, struggling children and confused parents. She has many stories of children and parents who tried every doctor, chiropractor, or nutritionist they could find with little or no success until they came to her office. She has successfully treated many children with a wide range of disabilities including: allergies, brain disorders, chronic illness, behavior problems, learning disabilities, autoimmune diseases, leaky gut, and much, much more.

Michelle will be covering a lot of practices parents can use at home to prevent these things from affecting our loved ones. We live in a fast-paced, ever-changing world with 30% of children now effected with some kind of ailment. Parents need to take action if they expect to maintain health at home in today's society.

Join us for a day of learning from one of the best in the child healthcare field. Come with an open mind and lots of questions.

## Join Us!

Registration is \$40 per person
